Outperforming design

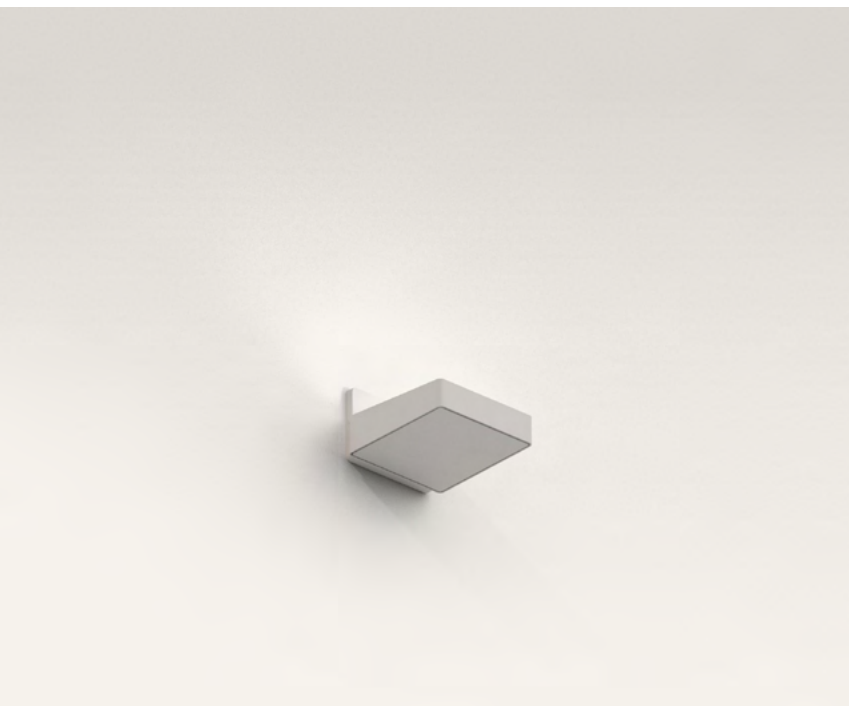

Angle and Angle Mini are about tailored performance in a sleek design. Advanced optics deliver controlled, efficient lighting that belies their slim profile.

With a range of high-performance luminaires, the Angle family offers sleek forms with unmatched indirect illumination. They are designed with strict attention to performance details – beam control, distribution shape, forward throw, and efficacy – packaged in a sleek, compact form.

Angle is intended for high-ceiling applications and large spaces, including auditoriums and educational institutions, airports and transit outlets, natatoriums, sports complexes, lobbies, libraries, and museums.

Delivers up to 49,886 lumens depending on options selected.

Compact and powerful, Angle Mini is made for the demanding spaces where light is essential but seamless integration is a challenge. With a refined form and multiple mounting options, it delivers clean, comfortable illumination that supports the architecture without becoming the focus.

Angle Mini is compact in size but big on performance. It carries the same clean lines and thoughtful design that make the Angle family instantly recognizable.

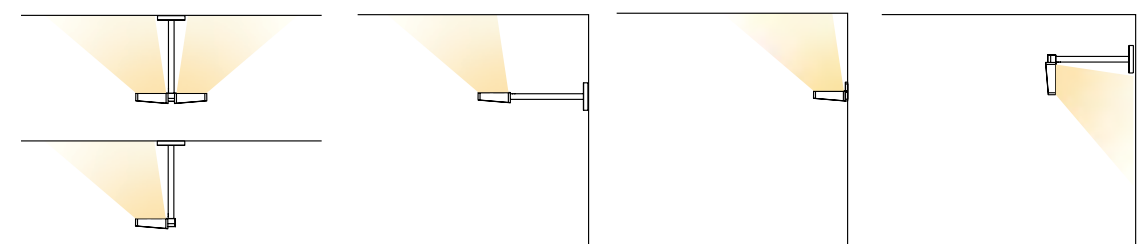

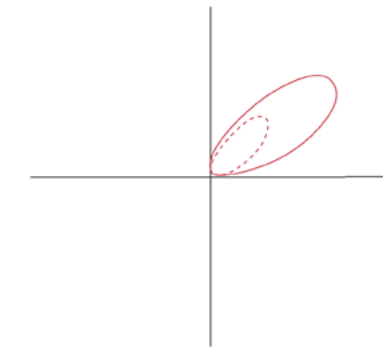

Delivers up to 4,000 lumens.

Asymmetric throw

Lumens: 12,151 lm/ft
Input watts: 101.8 W/ft
Efficacy: 119.4 lm/W

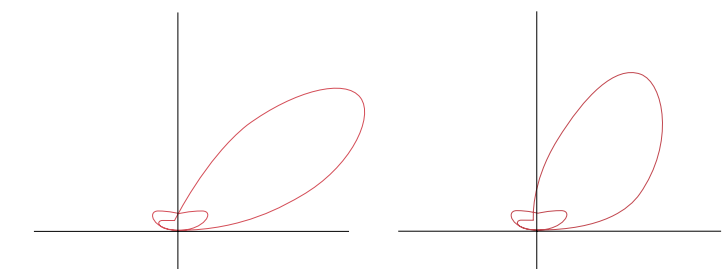

Even and far-reaching light projection across the ceiling

Asymmetric throw

Lumens: 4,000 lm
Input watts: 50 W
Efficacy: 80 lm/W

Clean, comfortable illumination across walls and ceilings

Regular Throw (RT)

Short Throw (ST)

Reach new (ceiling) heights

With a high output, Angle is designed for large spaces such as airports, transit stations and sports centers.

Subtle integration

Angle's sleek design enables it to elevate a space – subtly. It brings a soft, high output with uniform asymmetric distribution to a space while integrating seamlessly into the architecture.

Made for the in-between

Angle Mini's compact form enables it to bring high-quality, indirect light to smaller spaces. It delivers clean, comfortable illumination that supports the architecture without becoming the focus.

Columns in focus

With its Column mounting option, Angle Mini brings a new dimension to curved columns, making them the star of the space.

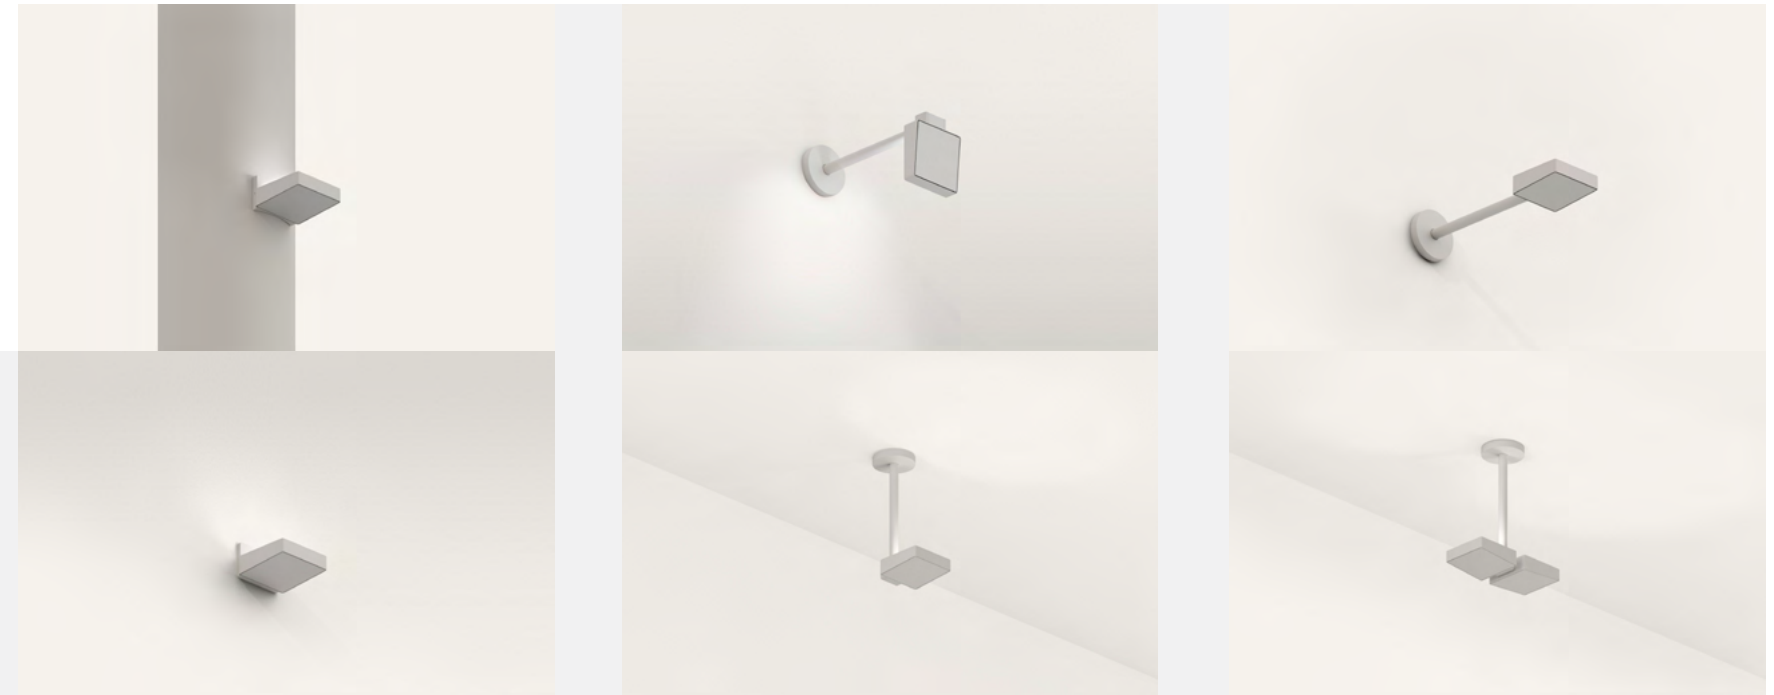

An array of possibilities

Both Angle and Angle Mini offer multiple mounting options, enabling a uniform design aesthetic throughout a project.

Dive in

Angle luminaires are suitable for wet locations. Each luminaire features a natatorium-rated finish on the body to ensure longevity in harsh environments.

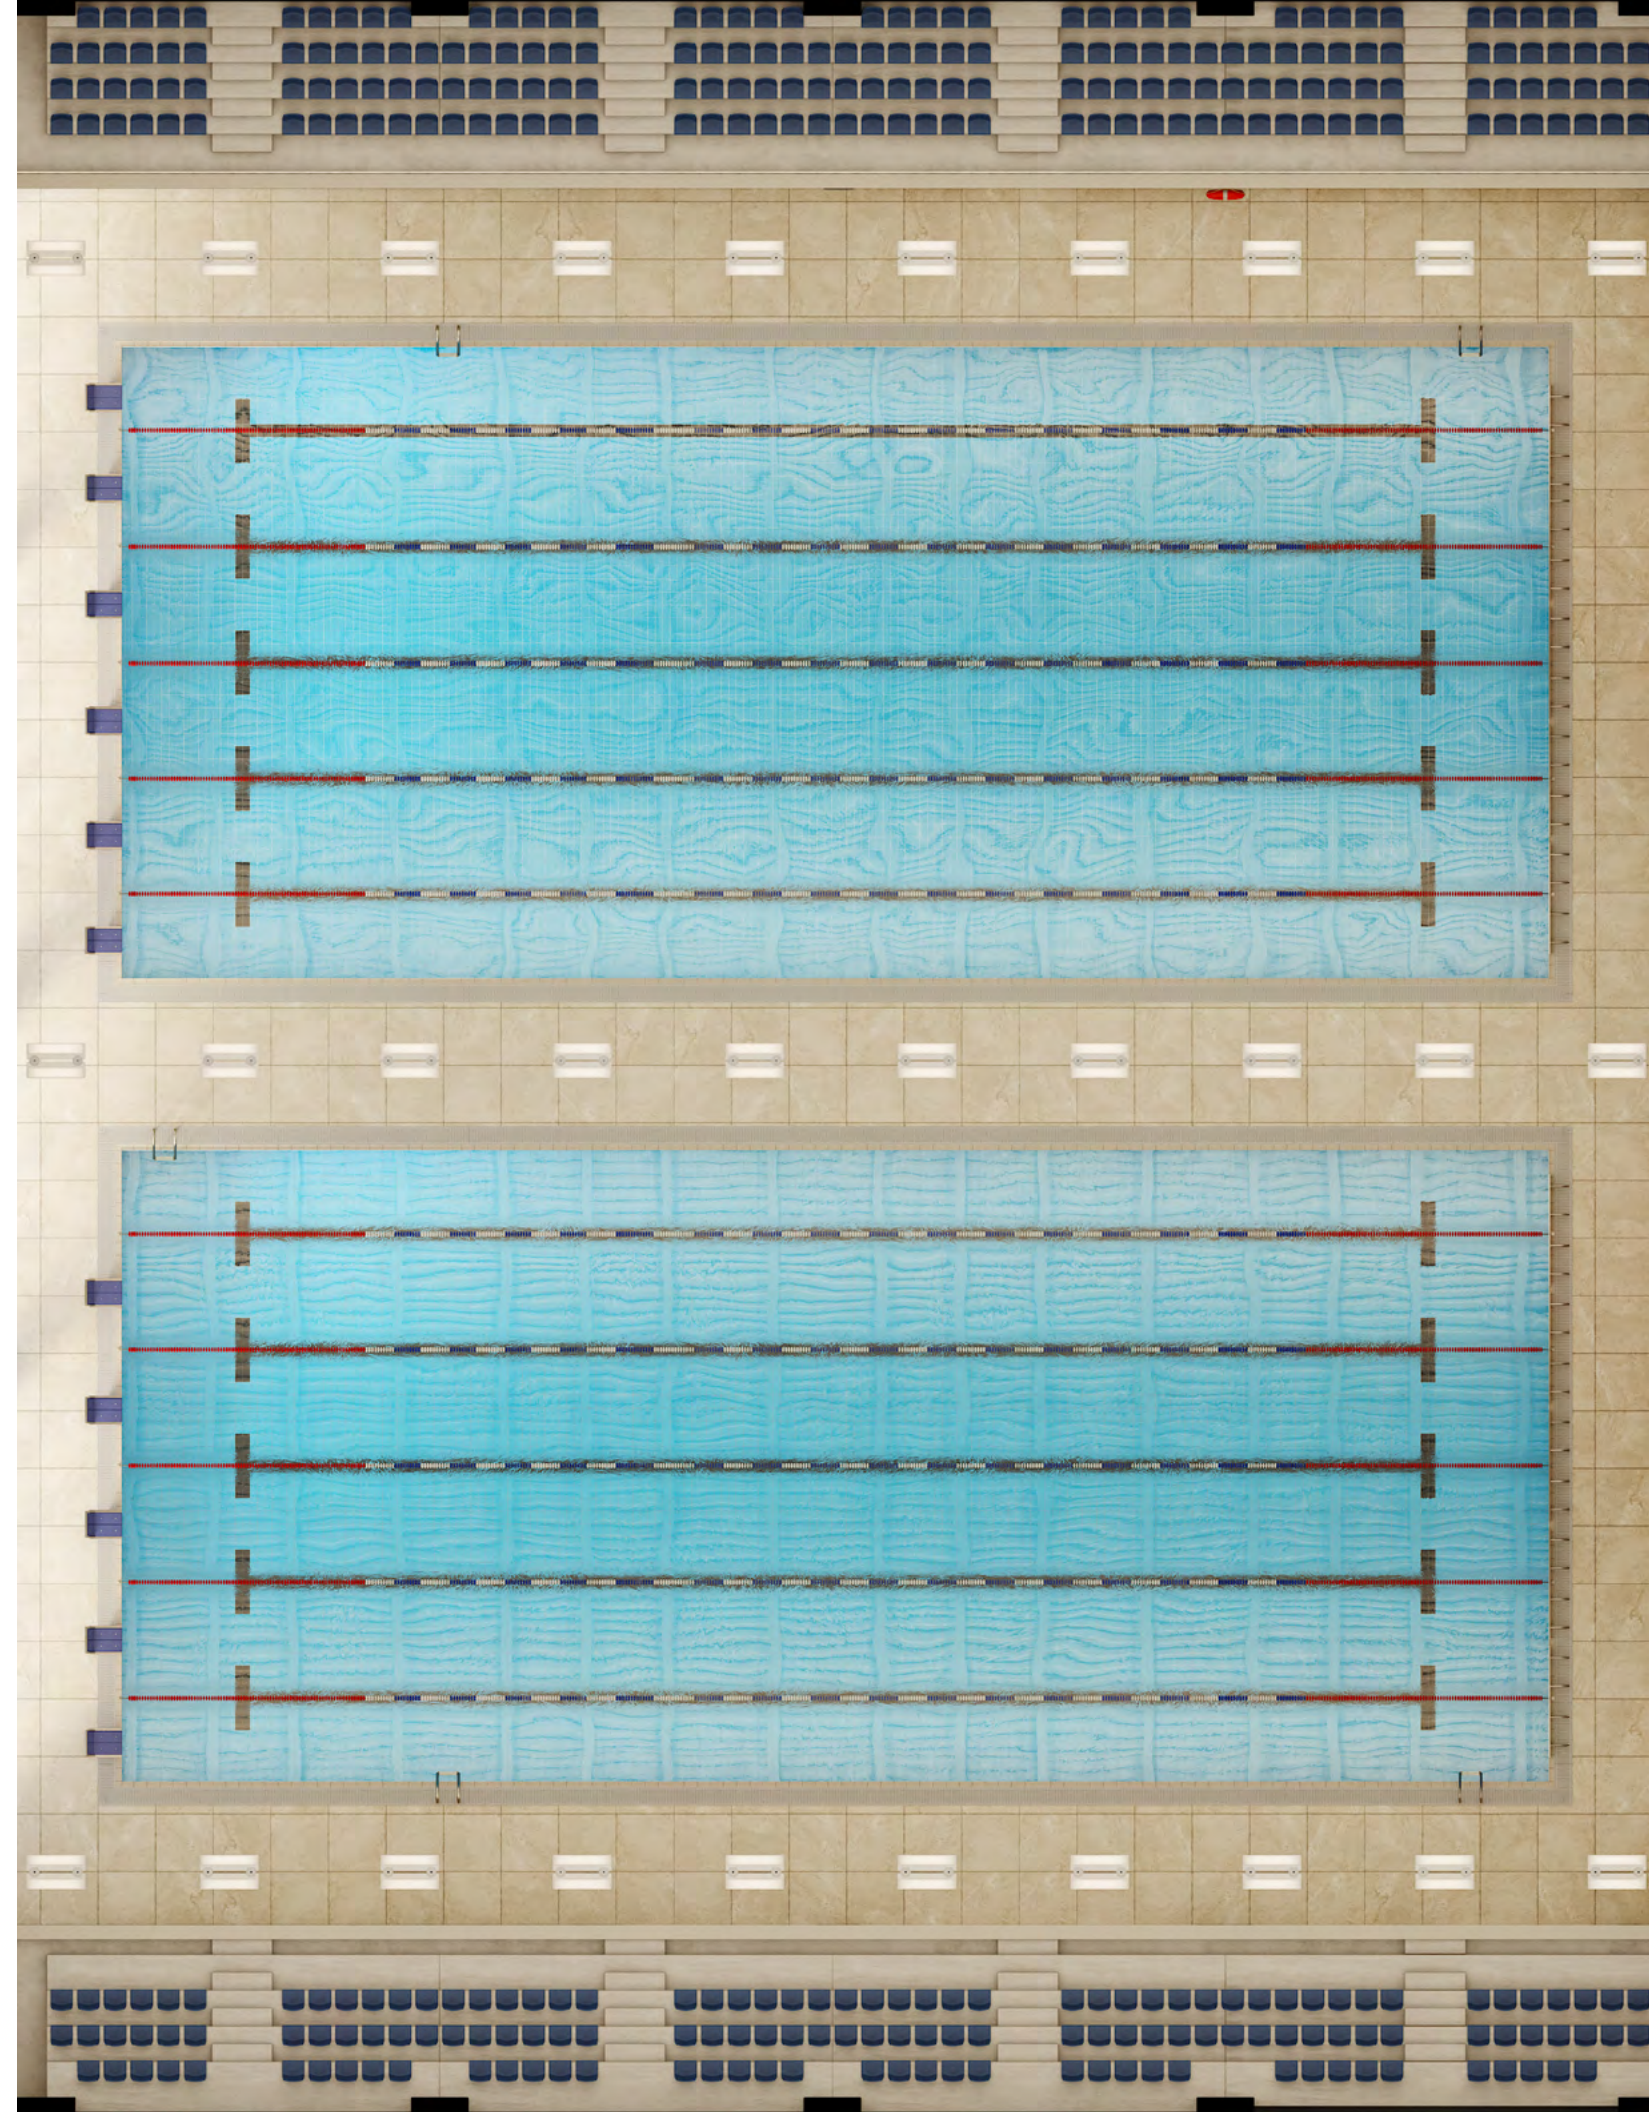

When specified for a natatorium, a clear cover is added on top of the luminaire to protect the optics, and gaskets seal the light engine from unwanted moisture.

Natatorium example

Angle can deliver 100 footcandle on pool surface which aligns with NCAA (National Collegiate Athletic Association) recommended best practices to ensure quality of light in the space.

| | |
|--|---------------------------|
| Room dimensions | 100' W x 150' L x 27.5' H |
| Fixture lumens | 40,408 lm |
| LLF | 0.95 |
| Mounting height | 20' A.F.F. |
| Target pool avg. illuminance | 100 fc (NCAA) |
| Actual pool avg. illuminance | 100.5 fc |
| Fixture spacing | 9' |
| Fixtures per row | 10 |
| Distance between row | 60' |
| Dual pendant 4' angle fixture quantity | 30 |
| Stem length | 5' |
| Fixture reference code | ANG24LVH35CRIUD2P60BK |
